EXPLANATORY NOTES
ALL GRAINS

1. The majority of the statistics presented in this publication are collected under the authority of the Canada Grain Act. Primary and process elevator companies report their grain handling activity on a weekly basis while terminal and transfer elevator information is received daily. Terminal and transfer elevator figures are current to the day but a lag exists in primary elevator statistics due to the large numbers of reporting points and the processing required at head office. As most deliveries occur at the primary level and most disposition occurs at the terminal level, an imbalance occurs in reported weekly statistics.

2. Statistics represent stocks and handlings of grain net of dockage at licensed Canadian elevators only. Although still termed 'net', terminal elevator shipments and exports of flaxseed and canola include approximately 2% dockage.

3. Domestic disappearance refers to grain i) processed in a licensed elevator, ii) shipped from a licensed to an unlicensed process elevator, or iii) shipped from a licensed elevator for use as food, feed or seed. Canadian grain processed in Canada is included in domestic disappearance whether or not the end product is consumed domestically or exported.

4. In addition, Statistics Canada indicates exports to the United States: 434 800 (493 900) tonnes of Wheat excluding Durum, 182 900 (152 100) tonnes of Oats, 45 000 (42 500) tonnes of Flaxseed, 54 800 (10 600) tonnes of Canola, and 124 400 (66 000) tonnes of Corn between August, 2007 and March, 2008. Year ago figures are shown in brackets.

5. Stock adjustments due to elevator weighovers, drying, grain cleaned ex dockage and handling adjustments due to reporting revisions are incorporated weekly into cumulative statistics. Other stock adjustments resulting from reporting lags and yearly reporting revisions are included only at year end.

NOTES EXPLICATIVES
TOUT LE GRAIN

1. La plupart des statistiques figurant dans la présente publication sont recueillies en vertu de la *Loi sur les grains du Canada*. Les silos primaires et les silos de transformation nous informent de leurs activités de manutention toutes les semaines tandis que les silos terminaux et les silos de transbordement le font quotidiennement. Les données que fournissent les silos terminaux et les silos de transbordement sont à jour, mais il existe un écart dans le cas des silos primaires par suite du grand nombre de déclarants et des tâches ultérieures dont doit s'acquitter le Bureau central. Comme la plupart des livraisons se situent à l'échelon primaire et la plupart des écoulements à l'échelon terminal, il est possible que les statistiques ne concordent pas.

2. Les statistiques représentent les manutentions et les stocks «nets» de grains uniquement aux silos canadiens agréés. Bien que les expéditions et les exportations de lin et de canola effectuées par les silos terminaux soient toujours qualifiées de «nettes», elles renferment environ 2 pour cent d'impuretés.

3. L'écoulement sur le marché intérieur se rapporte au grain : i) traité dans un silo agréé, ii) expédié d'un silo agréé à un silo de transformation non agréé et iii) expédié d'un silo agréé pour être utilisé comme aliment, aliment du bétail ou semences. Le grain canadien traité au Canada est compris dans l'écoulement intérieur peu importe que le produit final soit consommé au pays ou exporté.

4. En outre, Statistique Canada déclare: 434 800 (493 900) tonnes de blé (blé dur exclus), 182 900 (152 100) tonnes d'avoine, 45 000 (42 500) tonnes de lin, 54 800 (10 600) tonnes de canola, et 124 400 (66 000) tonnes de maïs exporté entre le mois d'août 2007et mars 2008. (2005-2006 entre parenthèses)

5. Les redressements de stocks attribuables aux pesées de contrôle, au séchage et au grain nettoyé (impuretés) ainsi que les redressements de manutentions attribuables aux déclarations révisées sont inclus dans les données cumulatives toutes les semaines. Les autres redressements, qui résultent d'écarts et de déclarations annuelles révisées, ne sont inclus qu'en fin de campagne.

DOMESTIC FEED GRAINS

1. Feed grain disappearance through the licensed elevator system accounts for only a portion (approximately 10-15%) of the total feed grain use. Most grain disappearance occurs on farms or moves outside the elevator system in farm to farm and farm to feedlot transactions.

2. Statistics on page 13 of this publication refer to Canadian domestic feed grains. This stock and handling information is included in the totals presented in the rest of the publication. That is, the domestic feed grain information is a sub set of the 'all grains' information presented on pages 3 to 13.

3. Canadian Wheat Board sales ex primary elevators are not included in commercial disappearance statistics. Sales ex Thunder Bay are reflected in Thunder Bay shipments but are not included in deliveries at Thunder Bay.

4. At times non-Board stocks and handlings are difficult to determine precisely because non-Board feed grain is physically the same commodity as Canadian Wheat Board feed grain. Through various transactions, any parcel of feed grain can change from Board to non-Board and back again before leaving the elevator system.

GRAINS FOURRAGERS CANADIENS

1. L'écoulement des grains fourragers par le réseau de silos agréés ne représente qu'une partie (environ de 10 à 15 pour cent) du total de ces grains. L'écoulement se produit en majeure partie dans les fermes, ou bien le grain est acheminé en dehors du réseau de silos et fait l'objet de transactions entre fermes ou de transactions entre fermes et parcs d'engraissement.

2. Les statistiques figurant à la page 13 de la publication se rapportent aux grains fourragers sur le marché intérieur. Ces renseignements sur les stocks et les manutentions sont inclus dans les totaux indiqués dans le reste de la publication. En d'autres mots, les renseignements sur les grains fourragers susmentionnés représentent un sous-groupe des données sur tous les grains (pages 3 à 13).

3. Les ventes de la Commission canadienne du blé, en partance des silos primaires, ne sont pas incluses dans les statistiques sur l'écoulement commercial. Les ventes, en partance de Thunder Bay, sont incluses dans les expéditions de Thunder Bay, mais ne sont pas incluses dans les arrivages à Thunder Bay.

4. Il arrive que les stocks et les manutentions hors-Commission soient difficiles à déterminer avec précision. Cela s'explique par le fait que les grains fourragers hors-Commission sont, du point de vue physique, les mêmes produits marchands que les grains fourragers de la Commission et, par conséquent, à la suite de plusieurs transactions, tout lot particulier de ces grains peut passer de l'un à l'autre et repasser au premier avant même d'avoir quitté le réseau de silos.
